## Math 137 Grade Sheet

Record your grades here. All assignments will be out of a total of 10 points. Exams should be recorded as percentages. You can estimate your attendance as a percentage of the number of class periods to that point. Use page 2 for additional space.

| Estimate Attendance |  |

The following breakdown shows how your grade will be calculated (taken from syllabus).

| Attendance | $10 \%$ of total |
| :--- | :--- |
| Homework and Individual Assignments | $20 \%$ of total |
| Group Assignments | $20 \%$ of total |
| Average of Three Exam Grades | $50 \%$ of total |

So, to estimate your grade at any point, we take a weighted average of the four categories, attendance, homework and individual assignments, group assignments, and exams. Follow the steps below to find your current grade.

1. Estimate your attendance percentage: (Number of days you came to class divided by total number of class periods so far, and multiply by 100)
2. Estimate your homework and individual assignments score: (Average all the scores, divide by 10 , and multiply by 100)
3. Estimate your group assignments score: (Average all the scores, divide by 10, and multiply by 100)
4. Estimate your exams score: (Average all the scores in percentage form)

Your above estimates should be in percentage form, so they should look like $85 \%$, not .85 .
5. Your current grade is equal to

$$
\begin{aligned}
& .1 \times \text { (attendance percentage) } \\
&+ .2 \times \text { (homework and individual assignments score) } \\
&+.2 \times \text { (group assignments score) } \\
&+ .5 \times \text { (exam score) }
\end{aligned}
$$
